mended by science or justified by experience. The board also request the physicians attending persons dying of yellow-fever to urge upon their friends the earliest possible burial, and to have the caskets containing such bodies surrounded with charcoal, to prevent the spread of the disease in the streets or cemeteries. The practice of advertising funerals, inviting friends to attend, is asked to be suspended. The city council, the sanitary association and the press were requested tary association and the press were requeste to urge the adoption of these suggestions.

INTERESTING LETTERS From a Well Known Citizen, Giving

Graphic Pictures of Points in Colorade, and Expressing Hopes of the Future Prosper-ity of Memphis.

Through the kindness of Colonel W. R. Stewart, we are permitted to print the following excerpts from letters written by Hon. J. W. Clapp, who, with his family, is now augurning at Colorade Springs, Colorado. The first is from a letter dated August 7th,

"We have been on the move almost ever since we reached here, and have seen a good deale of the country, especially the mountain scenery, which for sublimity, grandeur and naiqueness far surpasses my most sanguine expectations. Denver is a busy and growing commercial city of some twenty-three thousand, and its business houses are upon a large scale, and some of them would do credit to scale, and some of them would do eredit to New York. The climate has disappointed us, as it has rained almost every day, and the changes are very sudden and extreme. I have seen no town except Denver that offers any special attractions to business men, and if our unfortunate city could be freed from the pestilence, I would not exchange it for any place on the continent. For the abundance and variety, as well as value of its natural resources, I have seen no country comparable to our own. Here the chief dependence is upon the mines. The soil is thin and arid, upon the mines. The soil is thin and arid, and except where irrigation is practicable cereal productions are almost unknown, and grazing and cattle culture the dependence. Perhaps I judge the climate badly, as this is called; 'the rainy season,' and' is exceptionally damp and changeable, but it is not safe, according to my experience, to get out of sight of the house without taking an umbrella, overcoat and fan. This morning I was buttoned op to the chin in my winter clothing, and now I would be comfortable in my shirt sleeves. The thermometer sometimes shirt sleeves. The thermometer sometimes indicates a difference of thirty or forty de-

The following is of date August 21st:
"We watch the daily telegrams with very great interest, and have felt special anxiety as to Miles Owen, whom I have known in-The following is of date August 21st:
"We watch the daily telegrams with very great interest, and have felt special anxiety as to Miles Owen, whom I have known intimately for more than thirty years, Major Guy, also an old acquaintance, Bob Webb and Ed Moon. Poor Owen and Webb have fallen before the 'insatiate archer,' while the other two, who have hovered so long on the borders of the 'undiscovered country,' will, we may venture to hope, be spared. I am glad to hear of the vigorous measures of precaution and isolation adopted by the authorities, and it is greatly to be regretted precaution and isolation adopted by the authorities, and it is greatly to be regretted that this policy was not pursued from the inception of the plague. Daily, as I passed in and out on the street-cars. I could see persons who had just come from Tudge Ray's residence and Mulbrandon's, and who sometimes would take their seats among the presences. would take their seats among the passengers. If a feeble remonstrance was made, it was regarded as evidence of a timidity that only provoked ridicule, as the doctors had pronounced these only 'sporadic cases,' that were not considered contagious or infectious. I considered it then, and I spoke of it as a criminal carelessness or recklessness, from which the worst consequences were to be apprehended. Perhaps, from our present sore experience, we may be taught wisdom in the future. I have noticed with surprise, and, I may say, indignation, remarks in the Washmay say, indignation, remarks in the Wash-ington papers said to have been made by Dr. Mitchell, of Memphis, as to the future of Memphis. I am satisfied that the doctor has been misrepresented; for, in the first place, being a citizen of Memphis, even if his gloomy forebodings were well founded, as gloomy forebodings were well founded, as nothing but evil could result from their utterance, he would have kept his opinions to himself or, at least, out of the newspapers. puted to him are purely speculative and alto-gether improbable. About the close of the last century Philadelphia was visited by the fever two years in succession, the second year worse than the first; Havana rarely escapes a single year; New Orleans has been subject to it ever since it was a city, and many other points might be named that have suffered om its frequent visitations that have not

from its frequent visitations that have not only survived, but have continued to grow and prosper. It is very absurd to assert that there is any local cause which renders Memphis specially subject to its incursions. Topographically, its sanitary condition is certainly inferior to no other town or city on the Mississippi river, and its mortuary statistics, omitting the exceptional ravages of epidemics, compare favorably with any city of equal population north or south. No town is susceptible of more thorough sewerage, and when its natural advantages in this respect are utilized and the mass of rotting timber in the streets is supplanted by rotting timber in the streets is supplanted by stone pavements, the veriest croaker can assign no reason why we may not only hope and expect to escape epidemics, but why we shall not become proverbial for the health-fulness of our city. So far as our commercial interests are concerned, our advantages are pre-eminent and indestructible, and as I tell the prophets of evil with whom I meet, Memphis can afford to suspend business for four months in the year, and will then posany city of its size on the continent. Those predictions of our future decay and desola-tion are both unreasonable and mischievous. earnestly and faithfully do our part, and we rest in the assurance that the future of our city will as far surpass the present as Mem-phis of to-day does the straggling village that

Exedusting Exedusters. Nebraska City Press, 23d: "Not many weeks ago two car-loads of colored people poor, aged, penniless and ragged, were brought here from St. Louis and indiscriminately set down in a strange country, by designing men, and left to shirk for themselves. At the time the Nebraska Press character blacks, and the sequel proves our conclusions ployment; many of them did not find either, neither did they try to. Those who did find homes did not stay long, but left and congregated on the street corners. To-day ten families applied to the agent of the Kansas City, St. Joe and Council Bluffs railroad for free transportation to Kansas City. They are only waiting for a favorable reply to leave imme-diately for the sunny south. A Press reporter further interviewed one of them—Ben Owens. Mr. Owens says: 'We are tired of the country; it don't agree with us; we have been sick ever since our arrival; our people

productive of serious and speedy mischief to the entire bodily economy. The circulation languishes and grows poor; leanness, pallor, and a loss of muscular and organic power supervene; but, worse than this, the functions associated with and dependent tion of bile, grow irregular, and the organs whose business it is to discharge those functions become hadly disordered. This disastrous state of things is more readily and thoroughly rectified with Hostett r's Stomach Bitters than any known medicina agent. The stomach being invigorated, the life-giv-ing principles of the blood are increased, the system properly nourished. leanness and debility overcome, and the bowels and liver thoroughly and promptly

Ening. Thirteen are white persons.

If functional corpor of the liver exists, the emeats of the bile will remain in the blood, issing the fluid and inducing many skin senses. Dr. Bail's Baltimore pills are a set reliable liver regulator. Sold everying.

The dweicks, aged thirty-four years, is reported sick with fever at No. 89 Tchoupitoulas street. He was taken sick August 29th.

The board of health request the physicians to make immediate and careful report of all auspicious cases of fever, that the board may test, as far as possible, the efficiency of such preventive and restrictive measures against the spread of the fever as may be recombined.

A REVEREND RASCAL.

Shocking and Disreputable Tale of Two Continents-The Amours of Rev. Joseph P. Thompson, a Famous Michigan Minister, with

The Eifted Wife of an Industrious Livery of Heaven tolen to Serve

GRAND RAPIDS. MICH. Augustonia in possession of the Yacts.

Enquirer by its correspondent if The editor of the Times has the

here for this purpose, and, armed with letters of introduction to many distinguished residents in the capitals of the Old World, Mrs. DeLand sailed for Europe, living in Berlin for two years. She at last won the attention of Rev. Joseph P. Thompson, who, on account of the ill-health of his wife, found it advisable to become provided to the Company. ble to become a resident of the German me-The affluent clergyman was possessed of so-cial influence and burdened with a sick wife. The immediate result of this condition things seems to have been the formation of an alliance between Dr. Thompson and Mrs. DeLand, in which the former gave the latter

money and position in return for her un-bounded love. Letters from the noted divine to his new flame breathe the warmest devo-tion and the most intense passion. Subjoined are excerpts from a few notes written by Dr. mpson to his charmer: "You darling goosy! What a woman you are by nature, and what a woman I could make of you if I had you in training! See if you can fix the distinction between self-love and selfishness. Put one's own interests, plans, desires, gratifications, above all things plans, desires, gratifications, above all things else—this was always base; but self-love is simply that desire of happiness which is a native instinct of the human mind. Sift your motives, and see if you do not always act in view of the greatest apparent good. The good may not be real—may not be the best; but the involuntary instinct for happiness finally decides. You think you do right because you feel that you do what is best for your happiness, best for your deepest inner your happiness, best for your deepest inner feelings. Let us make it practical: If I am the tenth part of the man you think I am, I can readily believe that you would love such qualities. Suppose you fire this abstract love for the qualities with a passionate desire to

possess the person whom you fancy to have them? Suppose, as the reward of your love, you wish to make him all your own? Do you fancy I would say, 'Ah, that is selfish?' You love me because it makes you happy. You want me, because you think it would make you happy. You ought to have me, because this is right." A vast deal of philosophy does this worthy minister infuse into his love-making though of a mere superficial kind. Again the doc-"To-night I am to read my essay. Its object is to define religion—not christian, Jewish or Pagan, but religion in its fundamental idea. The definition I finally reach is: Re-

ligion is an inner sense of obligation to an in nature, position or power to ourselves, and which obligation prompts to acts of devotion or obedience with a view to please or placate its object. You see this does not restrict re ligion to the worship of a God, personal or otherwise, nor to any form of theological opinion of worship. You might make me the object. I should not object." The senile lover does not hesitate to gus forth at any and every opportunity. letter to his mistress, after a pedantic essay upon the victories of Titus, he touches light-

ly upon his own, thus:

"And now, my own sweet love, come nestle in my bosom, and read on page 162 (evidently referring to some book they had been reading together). Remember then that hour of consecration at Verona, when through hour of consecration at Verona, when through my touch you learned the delicate intention of spiritual thought and material beauty—that beauty of form, that delicacy of organization which, in 'you, I believe to be more pure than that of any divinity in marble! Then read on page 169, and fancy the exquisite enjoyment when I shall impart to you the sunshine of life, the nectar of the gods."

Another missive shows that the frail vocalist uses her amorous clergyman to some adist uses her amorous clergyman to some advantage. The following note would suggest that the doctor had been sweet on a shopping

"I could not match you any nearer. I would not send blue-white, because you have blues enough in your composition already. You can't have guilt, unless you will take me wholly in the sere and yellow leaf. You need not weave a net for me, however, since you have me fast enough already. If this does not suit, pray give it During much of the destine correspondence Dr. Thomp.
"Goosey," and himse.
in the following note: "This from the Old Maid. Don't you think she is nice to take so much trouble? She means to take her Goosey to Bologna, Florence and Rome, but thinks Verona and Florence will never lose their charms."

and a false key were all that was necessary to have the wife's shame blazoned before the man whom, of all others, she had wronged the most. Many of the letters have had the signatures cut off, but others remain unmutilated, and the chirography is identical in all. The proof of Dr. Thompson's liaison is as clear as is the identity of his mistress. Aside from the letters, the woman's husband pos-sesses the most undoubted evidences of her sesses the most undoubted evidences of her shame. On one of her bandboxes he found the name of "Mrs. J. P. Thompson, Westminster Palace Hotel, London." Research proves her to have stopped with the doctor at several of the foreign hotels, the couple booking as man and wife. Mrs. DeLand, upon being confronted by her husband, confessed that he loved Thompson, that she had never

that she loved Thompson, that she had never loved DeLand, and that she would have nothing to do with him.

The letters published in the Enquirer this morning have hitherto been seen by four persons only. Many of the facts in this sad affair will for the first time be read in this paper to-day; but the fall of Dr. Thompson—a man who has hitherto borne an unblemished reputation; a clergyman whose rank

han been that of the first; an author whose books have attracted the attention of the world; a gentleman of culture, manner and wealth, and one whose position on either side of the Atlantic is assured, has been looked for since the first hint of this scandal. Until yesterday all was but suggestion. Then came the culmination. The husband of the dishonored woman made his statement to the world, and the Enquirer has the important details of the matter in full. MARRIAGES.

> the Luxury. will be found the names of the white lored persons who took out marriage during the month of August, resof the yellow-fever epidemic. But its couples are registered, while the couples numbered thirty-six:

Couples Indulged in

August-But Five White

copies of the letters which so serious near pate Dr. Thompson. One lock in the char of evidence has been wanting, and so that paperihas hitherto refrained from giving publicity to the affair. That link has been supplied by the husband of the guilty woman; the chain is now complete, and the Enquirer is, therefore, enabled to give its readers the full particulars at first hands. For several weeks past certain of our leading citizens have been cognizant of the facts in the case given your leaders in full this morning. The parties who are accused of crime are Rev. Joseph P. Thompson, formerly a clerayman of this country, second only in reputation to Beecher, and Mrs. Sarah Deland, at present the leading soprino of St. Thomas church, New York city. Your correspondent here, in a full review of the ground, gleans these facts: Mrs. Deland is the wife of a newspaper pressman here. For nine years of their married life the humble couple were happy. Then the woman, who had a fair voice, was advised to go abroad for the cultivation of it. Funds were raised here for this purpose, and, armed with letters of introduction to many distinguished residents in the capitals of the Old World, Mrs. Deland sailed for Europe, living in Berlin for two years. She at least work to a sailed for Europe, living in Berlin for two years. She at least week years and Mars and Flora Patterson, George Rawlings and Mrs. E. Bacconean Malone, Gilbert W. uticura NOTICE!

Infallibly Cure all Skin and Scalp Dis eases, Scaly Eruptions, Itchings, and Irritations.

The testimonials of permanent cures of Skin and Scalp Diseases which have been the torture of a lifetime, by the Cuticura Remedies, are more wonderful than any ever before performed by any methods or remedies known to the medical profession.

Outicura Resolvent, a powerful Blood Purifier, is the only purifying agent which finds its way into the circulating fluid and thence through the oil and sweat glands to the surface of the skin, thus destroying the poisonous elements with which these vessels have been daily charged.

Outicura, The Great Skin Cure, applied externally, arrests all unnatural or morbid growths which cover the surface of the diseased glands and tubes with Scaly, Itching and Irritating Humors, speedily it removes them, leaving the pores open, bealthy and free from diseased particles of matter.

Thus internally and externally do these/great remedies act in conjunction, performing cures that have astonished the most noted physicians of the day.

SALT RHEUM FOR 30 YEARS On the Head, Face, and Greater Part of the Body, Cured

Messes. Weeks & Potter-Gentlemen; I have been a great sufferer with Salt Rheum for thirty rears, commencing in my head and face and extending over the greater part of my body. I have taken gallons of medicines for the blood of different kinds and tried good physicians, all of which did me no good, and I came to the conclusion that I could not be cured. But a friend called my attention to an article in the Union on skin diseases, and I got a box of Cuticura. The first application was a great relief, and the third took the scales all off, and I felt like a new man. I have used three 50 cent boxes, and my skin is smooth and I consider myself entirely cured. Hoping that this may be seen by some one afflicted as I have been (if there is any) is my earnest wish. And I cheeffully recommend it to all persons afflicted with like diseases.

Yours truly.

RuthSON LORD.

Agawam, Mass., Sept. 9, 1878.

The Cuticura Soap should be used for cleansing all diseased surfaces, as most soaps are injurious to the skin,

LEPROSY.

Modern Miracle-Astonishing Results from the Use of Cutienra. MESSES. WEEKS & POTTER—Gentlemen: We have a case of leprosy in our poorhouse which is being cured by your Cuticuru remedies. The county had employed all of our doctors and had sent to New York for advice, but to no avail.

The patient commenced using the Cuticura and immediately began getting better.

He had been confined to his bed for two and one-half years. Had not had his clothes on during this time! Last week he dressed for the first time.

When he walked, there would at least one quart of, scales come off of him.

This happened every day.

We think it is a wonderful cure.

We do not say he is cured, but he is in a fair way to be cured to say the least. Yours truly.

DUNNING BROTHERS.

Druggists and Bookseilers.

Druggists and Booksellers Allegan, Mich., February 11, 1879. Nors.—Messrs. Dunning Brothers are thoroughly reliable gentlemen, and were unknown to us prior to the receipt of this letter. We firmly believe this Cuticura will permanently cure this very severe case of leprosy, as it has done many others.

Prepared by Weeks & Potter, Chemists and Druggists, 360 Washington street, Boston, Mass., and for sale by all Druggists and Dealers. Price of Cuticura, small boxes, 50 cents; large boxes, containing two-and-a half times the quantity of small, \$1. Resolvent, \$1 per bottle. Cuticura Soap, 25 cents per cake; by mall, 30 cents; 2 cakes 75 cents COLLINS

VOLTAIC ELECTRIC Weak and Sore Lungs, Coughs PLASTERS and Colds, Weak Back, Stomach and Bowels, Dyspepsia, Shooting Pains through the Loins and Back, Spasms or Fits, and Nervous-Muscular and Spinal Affections, relieved and cured

Rags & Rag-Pickers

Ine letters are as endless as they are tiresome. They came into the possession of Mr. DeLand for the reason that he was led to suspect his wife and she was foolish enough to keep them in her trunk. An impression of the lock in wax, the absence of Mrs. DeLand and a false key were all that was necessary to have the control of the lock in wax, the absence of Mrs. DeLand and a false key were all that was necessary to have the control of the Board. J. CHANDLED W. D. D. CHANDLED W. D. D. CHANDLED W. D. CHANDLED W. D. D. CHANDLED W. any description; nor shall bedding, clothing, car-

OFFICE MEMPHIS COTTON SEED ASS'N, September 1, 1879.

WING to rigid quarantine rules in force we are unable to send out sacks until the restrictions are removed. We therefore reque t our friends to hold their seed until such time as we can furnish them sacks and receive shipments, which we confidently hope will not be later than the fifteenth of the coming month. Price, \$8 per ton, delivered on wharf or at mills in Memphis.

JOHN T. FLYNN, Sec'y and Tress. PLEASANT HOMES—During the summer months in Valley of Virginia, near Natural Bridge, at \$15 to \$18 per month. Apply to Mrs. JOHN D. HOUSTON, Longwood, Rockbridge county, Va. Beference—Rev. John S. Park, Bolivar, Tenn.

MALARIA

An Antidote which will cure every variety of Ague, Fever and Ague, and Chills and Fever, and leave no bad trace or disorder in the system, has been discovered by one of America's greatest Chemists. This préparation or principle is known by the name of CLIFFORD'S FEBRIFUGE. Being entirely free from minerals or other deleterious materials, it accomplishes its work without being in the least harmful to the system. This popular remedy differs from all other Ague Cures, in being free from all poisonous effects on the system; it enters

into the circulation and destroys all malarious poison, and thus eradicates the disease without producing any of those distressing after-sensations, such as fullness and pain in the head, ringing in the ears and partial deafness. It is a question of importance to all afflicted creatures, whetiser they will be cured of disease by remedies which leave a long train of bad aftereffects, or by a medicine that strikes at the cause of the malady and eradicates it,

without doing any more harm than that much water. No other preparation known exercises an eradicating power over intermittent diseases at all comparable with it. It enters the circulation and utterly destroys the germs of poison; it will purify and build up the debilitated system in a shorter time, and with more lasting benefit, than any other known remedy. As a Tonic, it acts as an Antiseptic and Blood Purifier, bringing renewed energy and vitality to the body worn down by disease. It is Nature's own remedy for all diseases arising

from malarial poison. Palatable, Powerful, Antiperiodic and Tonic, it never falls to cure Fever and Ague, Dumb Chills, Congestive Chills, Bilious Fever, Periodical Neuralgia, and all diseases of malarial origin. The only article known that will eradicate this disease permanently from the system. J. C. RICHARDSON, Sole Proprietor. General Agents, RICHARDSON & CO., Wholesale Druggists, St. Louis. SOLD BY ALL PROMINENT DRUGGISTS.
